SUMMARY

Product designer with 3+ years at Linkos Group (M.E.Doc, Cashalot): complex B2B products for e-documents, tax and government reporting and POS back-office. Lead designer on two products built from scratch. I turn business rules into states and flows, build components on tokens with light and dark themes, and take flows to clickable prototypes.

EXPERIENCE

UX/UI Designer

07/2023 – present

Linkos Group · M.E.Doc, Cashalot

- Lead designer on two web products built from scratch: a back office for a certificate authority (a qualified trust service provider) and services for the tax authorities (SOD RRO).
- M.E.Doc EDO, the e-document service: flows and interfaces across the product, from access rights and payment states to illustrations and the dark theme. One result is a balance and tariffs pattern that carried over to e-waybills.
- M.E.Doc e-waybills web app: a document list, a step-by-step form and version history. Moved the product from colour styles to shared tokens with light and dark themes.
- Cashalot knowledge base: a collapsible contents panel and a section icon set delivered as Figma components.
- Responsive interfaces for desktop, tablet and mobile. Daily work with a business analyst, analysts and developers on requirements and implementation review.

UX/UI Designer

04/2023 – 07/2023

Next Level Apps

- Led the redesign of 2 mobile apps and their desktop versions, 30+ screens. Ran a usability audit: 15+ friction points prioritised into Scrum sprints.

Freelance designer

2023 – present

Websites, mobile apps and landing pages

- Winum (2023): a wine store with a gastro-sommelier, designed for release with a team of developers and QA; 9 desktop screens and a UI kit.
- AI food scanner, an iOS app: onboarding, camera scanning, a 0–100 score with diet warnings, scan history and a subscription paywall.
- A portfolio website for photographer Maksym Fedorchuk and a web service for car ECU files.

Climbing instructor and route setter

10/2021 – 07/2023

Climbing Space · before moving into design
